Printed in The Netherlands.

CONTENTS

Preface	v
I. Visual Perception: Psychophysics and Physiology	
Early vision: Images, context and memory Dov Sagi	3
Psychophysical mapping of orientation sensitivity in the human cortex Johannes M. Zanker and Valentino Braitenberg	19
Multiple parietal representations of space Carol L. Colby, Jean-René Duhamel and Michael E. Goldberg	37
Neural mechanism of figure-ground segregation at occluding contours in monkey prestriate cortex R. Baumann, X.M. Sauvan and E. Peterhans	53
II. Cortical Implementation: Physiology and Anatomy	
Microarchitecture of neocortical columns Rodney J. Douglas, Misha A. Mahowald and Kevan A.C. Martin	75
Functional topography of horizontal neuronal networks in cat visual cortex (Area 18) Z.F. Kisvárdy, T. Bonhoeffer, D.-S. Kim, U.T. Eysel	97
Fast cortical dynamics: Receptive field plasticity, synaptic mechanisms and perceptual consequences Charles D. Gilbert and Aniruddha Das	123

Spatio-temporal dynamics of synaptic integration in cat visual cortical receptive fields Yves Frégnac and Vincent Bringuier	143
On the role of neural synchrony in the primate visual cortex Andreas K. Kreiter and Wolf Singer	201

III. Cortical Models and Computational Principles

Models for dynamic receptive fields and cross-correlograms in visual cortex George L. Gerstein and Jing Xing	231
Anatomical origin and computational role of diversity in the response properties of cortical neurons Kalanit Grill Spector, Shimon Edelman and Rafael Malach	247
Cell assemblies versus single cells Horace Barlow	261
Composition Elie Bienenstock	269
